Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

**Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 29th July 1909, based on the Indian Daily Weather Reports of the period.**

The rainfall of the week was connected chiefly with a depression which formed at the head of the Bay on the 23rd and travelled slowly in a westnorth-westerly direction into Central India where it disappeared on the 27th. Most of the rain was given by the Arabian Sea monsoon current and consequently the heaviest falls occurred to the south of the depression. During the latter part of the week the pressure distribution in northwest India was favourable for rain in lower Sind, Gujarat and Rajputana and on the 28th Kurrachee reported the unusually large fall of 3.42", which is almost equal to half its normal rainfall for the whole year. The Bay current was comparatively weak and after the 24th did not give much rain outside of Burma.

*Burma.*—Rain fell in all parts of the province, but was not very abundant at some stations in the northern and central districts. Cloud was moderate to heavy. Temperature was approximately normal.

*Northeast India, including Orissa.*—Rainfall occurred chiefly in the province of Bengal: in Eastern Bengal and Assam it was only light and local. Cloud was moderate to heavy in the southwestern districts of the division and light to moderate elsewhere. Normal temperature conditions prevailed.

*The United Provinces, Central India and the Central Provinces.*—Berar had practically no rain, but rain fell in all other parts of the division, the rainfall in the United Provinces occurring principally at the beginning of the week. Skies were moderately to heavily clouded in the Central Provinces and Central India, but in the United Provinces from the 25th cloud was only light to moderate. Temperature was normal or in defect.

*Northwest India.*—Excluding Baluchistan and upper Sind, nearly every observatory recorded some rain during the week. Moderate to heavy cloud was present in Gujarat, Rajputana and along the western Himalayas; elsewhere skies were clear or only lightly to moderately clouded. Maximum temperature was in defect in many parts of the division, especially on the 26th when the deficiency was moderate to large in the Punjab, Rajputana, Kashmir and the North-West Frontier Province.

*The Peninsula.*—Rainfall was most widespread on the west coast, the north Madras coast and in Hyderabad; in the rest of the division it was generally light and scattered. Cloud was moderate to heavy up to the 28th, when it decreased. Temperature was normal or in defect, the deficiency being most marked in the northeast of the peninsula.

The following summarises the chief rainfall amounts as reported at 8 hrs. each day :—

- July 23rd. Tavoy 4'10", Moulmein 4'07", Kyaukpyu 4'56", Darjeeling 3'73", Benares 3'10", Allahabad 3'92" and Lucknow 3'58".
- „ 24th. Bareilly 2'20", Nowgong 5'69" and Raipur 2'16".
- „ 25th. Sambalpur 4'27", Nowgong 4'20", Chanda 2'67", Ludhiana 2'16" and Mercara 4'23".
- „ 26th. Tavoy 5'72", Pachmarhi 2'09", Jubbulpore 2'28", Nagpur 2'56", Calicut 5'43", Trivandrum 4'36" and Mercara 5'51".
- „ 27th. Silchar 2'78", Hoshangabad 5'45", Lahore 2'06" and Masulipatam 2'27".
- „ 28th. Yamethin 2'50", Kurrachee 3'42", Mount Abu 2'95", Deesa 1'80" and Kotah 2'68".
- „ 29th. Sibsagar 3'54", Cuttack 2'73" and Mount Abu 2'32".

The week's rainfall was heavier than usual in Burma, the greater part of northwest India and in the Madras presidency; and was below the average in northeast India and Berar. The deficiency shown last week in seasonal rainfall in Sind has now been changed to an excess.

Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,  
24th July 1909.

**Burma.**—The rainfall during the week was heavy in Lower Burma and mostly moderate in Upper Burma. Ploughing for the main rice crop is approaching completion in places and sowing and transplanting are progressing. Cultivation of autumn crops continues in Upper Burma. Agricultural operations have been retarded for want of rain in Katha and parts of Prome. More rain is also required in Minbu, Bhamo, Shwebo and Sagaing. Standing crops are on the whole in good condition. The price of unhusked rice has risen slightly in seven districts; it has fallen considerably in one district and slightly in three others.

**Eastern Bengal and Assam.**—The weather was favourable in the Chittagong and Dacca divisions and hot in Rajshahi, Cachar and Sylhet. More rain is needed in Rajshahi, Darrang, Nowgong, Sylhet and Manipur where the rice crop is being retarded through want of flood water. Prospects of jute are generally good. Poor reports have been received from Rangpur of the results from the fibre steeped. Prospects of rice are good on the greater portion of the land sown but in Goalpara, the Garo Hills and parts of Bogra reports are poor. Prospects of tea are only fair and the leaf is reported scarce. Green-fly is prevalent in Lakhimpur. Hill crops of potatoes are good. Prospects of cotton are good in the Cachar Hills. Harvesting of jute and autumn rice continues. Transplanting of winter rice is nearly done. No relief works are open. The number on gratuitous relief in Rangpur is 39. The average price of common rice remains unaltered. Cattle disease is prevalent in several districts.

**Bengal.**—The rainfall during the week was general; it was heavier than usual in South Bihar, Saran, Darjeeling, Hazaribagh, Khulna and Cooch Behar. In Lower Bengal, Orissa and the Bhagalpur division it was generally light. Transplantation of winter rice is in progress but more rain is required for this operation in Purnea, the Sonthal Parganas, Angul and Sambalpur and in South West Bengal excepting Khulna and the 24-Parganas. The condition of jute, sugarcane, autumn paddy and other standing crops is good. Some little damage by insect-pests to paddy and jute is reported from Nadia and Jessore. The price of common rice has risen in Burdwan, Bankura, the 24-Parganas, Palamau and Manbhum and has fallen in Gaya, Shahabad, Darbhanga, the Sonthal Parganas, Hazaribagh and Ranchi. Cattle disease is prevalent in several districts. The fodder and water supply is sufficient throughout the Province. The number of persons on famine relief works in Darbhanga was 738. These works have been closed from the 24th July. The number of persons gratuitously relieved in Muzaffarpur, Darbhanga and Palamau was 26,351.

The weekly report on the famine and scarcity is as follows:—District Darbhanga—The numbers on relief works were 738 on the 21st July. All relief works were closed on the 24th July. The number of persons gratuitously relieved was 24,677. Valedictory doles are being given and relief operations are being closed. Crop prospects are excellent. *Makar* is selling at 13½ to 14 seers per rupee in Darbhanga bazar but is dearer in the interior. Early *marna* is being harvested in the Madhubani sub-division.

**United Provinces.**—Heavy rain fell throughout the Provinces. Late autumn crops are being sown. Early crops are being weeded. Transplantation of late rice is in progress. Land is being prepared for sowings of spring crops. The condition of standing crops is generally good but heavy rain has retarded weeding. A break in the rains is now required, especially in Bundelkhand. Some damage from floods is reported from Farrukhabad, Budaan, and North Oudh. Cattle disease is reported from twenty-two districts but the general condition of agricultural stock is good. Markets are well supplied. Prices are generally stationary.

The weekly report on the famine and scarcity is as follows:—The health of the labouring and cultivating classes and of persons on relief is good. Crime is normal. All relief works have been closed. Gratuitous relief is confined to Kheri and Bahraich and will be closed in Kheri on the 8th August with a fortnight's valedictory dole. The numbers reported include recipients of valedictory doles in Mirzapur, Basti and Garhwal. One poorhouse is open in Bahraich. The numbers on Government relief are:—on gratuitous relief 18,784; on poorhouse relief 35; total 18,819. Prices:—Kheri 14; and Bahraich 14½ seers per rupee.

**Punjab.**—Good to heavy rain fell during the week throughout the Province. The heaviest fall registered was a little less than 9 inches at Naraingarh in the Ambala district. Elsewhere the rainfall generally ranged from 6 to 1½ inches except in parts of Mianwali, Lyallpur and Multan where it was less than 1 inch. Sowings of autumn crops have been completed in Gurgaon but continue satisfactorily in other districts. Standing crops are generally in good condition and have been much benefited by the rains. Slight damage has been done to crops by insects in parts of Rohtak. The melon crop has been damaged by flood in parts of Mianwali. Prices are generally unchanged. A slight fall in prices is reported from Ferozepore and Rawalpindi. Cattle are generally in good condition and fodder is sufficient. Complaints of a short water-supply are general in the Samundri and Toba Tek Singh tahsils in the Lyallpur district where there has also been less rain.

**North-West Frontier Province.**—General rain fell all over the Province ranging from 10 cents in the Mardan tahsil of Peshawar to 4 inches 4 cents in the Tank tahsil of Dera Ismail Khan. It was beneficial to standing crops and for sowing of autumn crops. The condition of standing crops is average. Harvesting of extra spring crops continues in Bannu and the outturn in Bannu and Peshawar is average. The public health is good. Cattle disease is reported in the Peshawar district. Canal irrigation in Peshawar is satisfactory and rivers are rising. Irrigation from the Pabarpur canal in Dera Ismail Khan is still stopped. The Tochi and Kurram rivers are in flood. Prices are rising slightly. Prices:—wheat 10½ to 11½; maize 14½ to 16½; gram 12½ to 16; *dajra* 12½ to 13½; and barley 18½ seers per rupee.

**Jammu.**—Good rain fell during the week. Prices are fluctuating. Wheat sells from 10½ to 16½ and maize from 13 to 20 seers per rupee. The condition of standing crops is fair. Cattle disease of mild type is reported in two districts. Fodder is sufficient. Sowing of crops for the autumn harvest is in progress.

**Kashmir.**—The weather was bright with occasional rain which was beneficial to autumn crops. The present condition of crops is good particularly *tilgugloo*, *shalli* and *makai*. Fodder is sufficient. There is no disease among cattle. Prices are unchanged.

**Rajputana.**—There has been good rain at Sirahi. Other places report the following amounts (in cents):—Banswara 457; Tonk 422; Jaisalmer, Partabgarh, Kishangarh, Alwar, Bharatpur and Ajmer 206 to 370; and Bikaner, Marwar, Shahpura and Merwara 101 to 145. Elsewhere the amounts received ranged from 67 to 99 cents. Agricultural operations are satisfactory. Early sowings have germinated well. Prospects are favourable. The condition of cattle is good. Pasturage and fodder are ample. Prices are generally becoming easier.

**Central India.**—The rainfall during the week was general and sufficient except in parts of Gwalior. Sowing of autumn crops has been completed in Indore and Bhopal. Weeding is in progress elsewhere. Land is being prepared for spring crops in Gwalior. Agricultural stock are satisfactory except for some cattle disease in parts of Indore, Bhopal, Baghelkhand, Bundelkhand and Bhopawar. Prices are falling in Bhopawar and Malwa and are stationary but high elsewhere.

**Central Provinces.**—During the week heavy showers were received in Bhandara, Hoshangabad, Nagpur, Chanda and Bilaspur, ranging from 9 to 5½ inches. Elsewhere the rainfall did not exceed 4½ inches. In Saugor, Narsinghpur and Nagpur a break

would facilitate field operations and benefit the crops. Sowing of autumn crops is completed in most districts but continuous rain has slightly impeded operations in Nagpur and Damoh. Germination is successful everywhere. Weeding, thinning and transplanting are in full swing. Preparation of land for sowing of spring crops continues in Saugor, Narsinghpur and the districts of Berar. Fodder and water are sufficient. Cattle are doing well. Prices:—*juar* in Nimar and gram in Chanda became cheaper by 1½ seers per rupee. Elsewhere prices were steady or fluctuated slightly.

*Feudatory States.*—During the week Sirguja and Jashpur received 8 and 6½ inches of rain respectively. In Sarangarh, Raigarh, Kanker, Raj-Nandgaon, Chhuikhadan and Sakti the quantity registered ranged from 2 to 4½ inches. A break would be beneficial in Raigarh. Sowing, thinning and weeding of autumn crops continue. Transplantation of rice has been started in Kanker, Raigarh and Sarangarh. Germination is good but cotton in Raj-Nandgaon and rice in Sakti were damaged slightly by insects. The supply of fodder and water are adequate. Prices:—wheat and rice in Kanker rose by 1 seer per rupee. There were no marked variations elsewhere.

*Bombay.*—The rainfall during the week was heavy in parts of the Konkan, Nasik, Poona, Satara, Belgaum, Savantvadi and Kolhapur; good in parts of the Panch Mahals, Kathiawar and Rewa Kantha; moderate in parts of the Upper Sind Frontier, Thar and Parkar, Ahmedabad, Surat, West Khandesh, Dharwar and Palanpur; and slight in parts of Karachi, Sukkur, Larkana, Hyderabad, Broach, East Khandesh, Ahmednagar, Sholapur, Bijapur, Baroda, Cutch and Mahi Kantha. The rain was beneficial but more is needed for cultivation of autumn crops in parts of Karachi, Thar and Parkar, Kanara, West Khandesh, Nasik, Ahmednagar, Poona, Satara, the Karnatak and Kolhapur. Sowing of autumn crops continues generally but has been retarded in parts of Bijapur owing to insufficient rain. Transplantation continues in parts of Sind, Ahmedabad, the Panch Mahals, Surat, the Konkan, Nasik, Poona and Satara and has commenced in Belgaum. Standing crops have been slightly damaged by insects in parts of Bijapur and Cutch and are suffering in parts of Bijapur and Poona owing to insufficient moisture. They are generally in good condition elsewhere. Sowing of cotton continues in parts of Ahmedabad, Baroda and Cutch. The fodder supply is adequate. Agricultural stock are sufficient except in parts of Ahmednagar, Poona, Sholapur, Satara and Cutch and are generally in good condition. The supply of drinking water and of water for irrigation are generally adequate. Prices of food grains have fallen slightly in Ahmedabad, Surat, Kanara, Ahmednagar and Belgaum; have risen slightly in Karachi, Hyderabad and Kathiawar; and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 31 to 41 per cent; in Gujarat 17 to 42 per cent; in the Konkan 10 to 35 per cent; in the Deccan 17 to 31 per cent; and in the Karnatak 30 to 40 per cent less than the normal. Stocks of grain are adequate. Labourers get sufficient employment. The cultivating and labouring classes are generally in fair condition. 93 persons were gratuitously relieved in Bijapur.

*Hyderabad.*—The rainfall during the week was 1 inch 30 cents. Rain fell all over the Dominions. It was good in Adilabad and Nizamabad, averaging 3 inches 10 cents and 2 inches 97 cents respectively. The remaining districts received on an average between 1 inch 85 cents and 67 cents. The fall was poorest in the Raichur district where only 9 cents were received. Rain is urgently needed in Kuppal in the Salar Jang Estate. The highest falls were 3 inches 85 cents and 3 inches 68 cents in the Lakshattipet and Adilabad talukas of the Adilabad district and 3 inches 2 cents in the Bhokardan taluka of the Aurangabad district. Sowings of autumn crops continue in most parts but are still suspended for want of rain in parts of the Raichur district where prospects have not yet improved. Crops are generally fair to good but are reported to have been damaged by excessive rain in parts of the Aurangabad district and by insects in parts of the Mahbubnagar, Huzurnagar and Pakhal talukas. In the Pakhal taluka the crop was considerably benefited by the week's rain. Early rice is being sown in parts of the Telingana district and the crop is fair to good. Lands are being prepared for spring crops. Fodder scarcity is reported in the Kushtagi, Lingsugur and Huzurnagar talukas and water scarcity in Yallareddi and Kushtagi. Cattle disease prevails in three talukas.

Prices:—wheat 7; coarse rice 7; and *juar* 14½ seers per rupee. White *juar* is selling in Hyderabad City at 12½ seers per rupee. Yellow *juar* is not available. The highest price in districts is 8½ seers in the Kushtagi taluka of the Raichur district and the lowest 23 seers in the Udgir taluka of the Bidar district.

**Mysore.**—Good rain fell in Kadur and Shimoga and slight rain elsewhere. Prices of food grains are generally steady and markets are well supplied. Standing crops are in good condition but more rain is needed in parts of Bangalore, Kolar, Tumkur and Mysore. Cattle are generally healthy. Water and fodder are available.

**Coorg.**—The rainfall during the week was 16 inches 74 cents. Ploughing for, and transplanting of, rice continue. Cattle disease prevails in parts. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

**Madras.**—The rainfall was very heavy in South Canara; heavy in Malabar; good in Madras, Ganjam, Godavari, Chingleput, Kistna, North Arcot, the Nilgiris and Kurnool; nil in Madura and Tinnevely; and light to fair elsewhere. Irrigation supplies are insufficient in parts of districts except Vizagapatam, Godavari, Kistna, Chingleput, Trichinopoly, Malabar, South Canara and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are generally fair, but some in parts of Bellary, Salem and Coimbatore require more rain and some in parts of North Arcot and Madura are withering. Harvests continue in parts with outturn poor to normal. Pasture is insufficient in parts of Guntur, Bellary, Cuddapah, Nellore, South Arcot, Coimbatore, Trichinopoly and Tinnevely. Fodder is scanty in parts of the Circars, the Deccan, South Arcot and North Arcot. The condition of cattle is generally good. The price of rice is stationary in fourteen districts; has fallen in two; and has risen in seven. The prices of millets have fluctuated as follows:—*Ragi* is stationary in nine districts; has fallen in three; and has risen in nine. *Cholam* is stationary in four districts; has fallen in four; and has risen in six. *Cumbu* is stationary in eight districts; has fallen in four; and has risen in three. The public health is generally good. Prospects are generally fair. The condition of the labouring classes is good and employment is procurable. Grain stocks are generally sufficient.

FAMINE.

*Statement showing the number of persons on relief works and in receipt of gratuitous relief in the Districts and Native States affected by famine or scarcity in India—(District details).*

NOTE.—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the corrected details of the totals reported in the telegraphic famine reports published weekly in the Supplement to the Gazette of India.

Non-labouring children and other dependants of relief workers are classed under relief works when distinguished in the local returns from persons gratuitously relieved in poor-houses or at their houses. Weavers relieved in their own trade are shown under "village doles or other relief."

Printed and published for the GOVERNMENT OF INDIA at the GOVERNMENT CENTRAL PRINTING OFFICE, Simla.

SUPPLEMENT TO  
**The Gazette of India.**

No. 32 }

CALCUTTA, SATURDAY, AUGUST 7, 1909.

**OFFICIAL PAPERS**

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the Gazette may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

N.B.—Provinces named in the first and last columns include their chief port or ports. "Madras ports" include the ports of Madras, Pondicherry (exclusive of sea imports from Non-British Ports and Foreign countries) Negapatnam, Tuticorin, Calicut, Cocanada, Viragapatnam, Cuddalore, Cochin, Tellicherry, Cannanore, Masulipatam, Mangalore, Quilon (exclusive of sea imports) Porto Novo, and Badagara. The last 8 ports were added from 1st April 1909.

H. A. STUART,

Secretary to the Government of India

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 5th August 1909, based on the Indian Daily Weather Reports of the period.**

A depression formed at the head of the Bay on the 28th July. It crossed the coast near Balasore on the 31st and advancing in a westnorthwesterly direction was shown lying over Rajputana on the 3rd. It then apparently moved in a northerly direction and disappeared. As the depression was in existence almost throughout the week it was the chief factor in the distribution of the week's rainfall. More rain than usual was received in a broad track of country extending from Orissa to Rajputana and comprising Orissa, the Central Provinces, the west of Central India, Gujarat and Rajputana, while to the north and south of this region rainfall was generally either normal or in defect.

*Burma.*—Rain fell in all parts of the province. Skies were moderately to heavily clouded and temperature was normal.

*Northeast India, including Orissa.*—At the beginning of the week rainfall occurred chiefly in the province of Bengal, and during the remaining days in Eastern Bengal and Assam. Skies were moderately clouded. From the 30th July to the 1st August the maximum temperatures reported from Eastern Bengal were somewhat higher than usual.

*The United Provinces, Central India and the Central Provinces.*—At the beginning and end of the week rain fell in the United Provinces, but during the rest of the week it occurred chiefly in the Central Provinces and Central India. In the last two areas cloud was moderate to heavy; in the United Provinces skies were on most days clear or only lightly clouded. Temperature was normal.

*Northwest India.*—Local falls of rain occurred in all parts of northwest India, except Baluchistan, and heavy rain was reported from the Aravalli hills on the 30th July and 3rd and 4th August. Skies were on the whole moderately to heavily clouded in the eastern and southern districts of the division and clear or lightly clouded elsewhere. The maximum temperatures reported were in defect on the 30th and 31st July in the Punjab and Rajputana, and on the 4th and 5th August in Rajputana.

*The Peninsula.*—Rainfall was of daily occurrence on the west coast, but was comparatively light in amount. A few scattered falls occurred in other parts of the peninsula, chiefly in the Bombay Deccan and Hyderabad. Cloud was moderate to heavy on the first three days of the week, but decreased on the 2nd August and on the remaining days skies were only lightly to moderately clouded. Temperature was approximately normal.

The following summarises the chief rainfall amounts of the week, as reported at 8 hrs. each day:—

July 30th. Ludhiana 2'30", Mount Abu 8'07" and Surat 1'95".

July 31st. Tavoy 4'20", Myitkyina 2'35", False Point 2'36", Dehra Dun 2'78", Raipur 7'30" and Ludhiana 4'25".

August 1st. Akyab 4'74", Balasore 2'26", Saugor 2'64" and Chanda 3'40".

" 2nd. Toungoo 3'27", Indore 2'91", Akola 3'34", Hoshangabad 4'35", Saugor 4'85", Jubbulpore 2'35", Seoni 2'18", Pachmarhi 4'08" and Surat 2'83".

" 3rd. Dibrugarh 3'87", Cherra Poonjee 7'50", Bahraich 2'90", Neemuch 6'22", Mount Abu 12'96", Deesa 6'70" and Udaipur 5'07".

" 4th. Kyaukpyu 8'48", Dibrugarh 2'10", Chittagong 5'70", Narayananganj 4'15", Deesa 4'04" and Mount Abu 6'31".

" 5th. Moulmein 4'12", Kyaukpyu 5'50", Akyab 5'27", Barisal 6'05", Dinajpur 3'01", Jalpaiguri 3'81", Saugor Island 2'82", Jessore 2'41", Rawalpindi 2'54" and Mysore 3'52".

The rainfall of the period from 30th April to date is 20 per cent or more in defect in only two divisions, *viz.*, Chota Nagpur and Baluchistan. It is 20 per cent or more in excess in Bihar, the east of the United Provinces, almost the whole of northwest India, north Hyderabad and south India.

R. W. CARLYLE,  
Secretary to the Government of India.

SIMLA:  
The 5th August 1909.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,  
31st July 1909.

**Burma.**—The rainfall during the week was general and fairly well distributed; it was heavy in Tenasserim and mostly moderate to good elsewhere. Ploughing for the main rice crop has been completed in a few places and sowing and transplanting are in progress. Cultivation of autumn crops continues in Upper Burma. Agricultural operations have been retarded in parts of Prome owing to insufficiency of rain but prospects in Shwebo have been improved by the recent rain. More rain is needed in Minbu, Bhamo, Katha and Sagaing. The condition of crops generally is good except in portions of Katha and Bhamo where they are poor. The price of unhusked rice has risen considerably in one district and slightly in five others; it has fallen considerably in two districts and slightly in another.

**Eastern Bengal and Assam.**—The weather was generally seasonable in the Chittagong and Dacca divisions but the heat continues in Rajshahi, Cachar and Sylhet. More rain is wanted for transplanting winter rice in Dinajpur, Malda, Sylhet, Cachar, Kamrup, Upper Assam and Manipur. Rain is also wanted in the Chittagong Hill Tracts and the Khasi and Jaintia Hills. Prospects of jute are generally good except jute on low lands which has suffered from floods, specially in Rampur. Cutting and steeping are in progress. Prospects of rice are also generally good but in Barpeta in the Kamrup district the damage done to autumn crops was so great that scarcity is apprehended. Tea is suffering from want of rain. The number on gratuitous relief in Rangpur has fallen to 12. All real scarcity is completely over. The average price of common rice shows no appreciable change. Cattle disease prevails in several districts.

**Bengal.**—The rainfall during the week was heavy in Cuttack and Sambalpur; moderate in parts of the Presidency division as well as in parts of Birbhum, Midnapore, Shahabad, Darjeeling, Balasore, Angul, Ranchi and Palamau; and light elsewhere. Transplantation of winter rice continues but its progress is being retarded in parts of Midnapore and in Burdwan and Hazaribagh for want of sufficient moisture. More rain is wanted in Lower Bengal and also in Champaran, Purnea, the Sonthal Parganas and Angul. Sugar-cane, jute and other autumn crops are doing well. Harvesting of jute has commenced in parts of Burdwan, Nadia and Purnea. Insects are still doing injury to jute and autumn paddy in Nadia. The price of common rice has risen in Birbhum, Bankura, Howrah, Hazaribagh, Ranchi and Singhbhum and has fallen in Jessore, Gaya, Shahabad, Saran, Champaran, Muzaffarpur, Bhagalpur, Purnea, the Sonthal Parganas, Angul, Puri, Sambalpur, Palamau and Manbhum. The supply of fodder and water is sufficient all over the Province. Cattle disease is reported from several districts. The number of persons on gratuitous relief in Muzaffarpur and Darbhanga was 22,091. It is reported however from Muzaffarpur and Darbhanga that all relief operations were closed finally with effect from the 30th and 31st July respectively. Relief operations are also being closed in pargana Japla in the district of Palamau.

The weekly report on the famine and scarcity is as follows:—District Darbhanga—Workers exclusive of dependants nil; on gratuitous relief (a) dependants of workers nil; (b) poorhouses or kitchens 615 and (c) village doles or other relief 19,690; total gratuitously relieved 20,305. Grand total on relief 20,305. All relief operations were closed on the 31st July. Valedictory doles are being given. Crop prospects are excellent at present. Prices 12 to 13 seers per rupee.

**United Provinces.**—The rainfall was general but less heavy than in the previous week. Late sowings continue. Weeding of autumn crops, transplanting of late rice and preparation of land for spring sowings are in progress. Early crops are ripening and are being harvested in a few districts. Standing crops are good almost everywhere but a break in the rains would be beneficial, especially in Bundelkhand. Some local injury from floods is reported. The condition of agricultural stocks is good but twenty districts report cattle disease. Markets are well supplied. Prices are generally stationary.

The weekly report on the famine and scarcity is as follows:—The general health is good. Gratuitous relief continues in Kheri and Bahraich. Final payments for a period of a fortnight will be made in Kheri on the 8th and in Bahraich on the 28th August. The numbers reported include those in receipt of valedictory doles in Mirzapur, Basti and Garhwal and workers who have received a final dole in Bahraich. The numbers on Government relief are:—on gratuitous relief 18,634; on poorhouse relief in Bahraich 20; total 18,654. Prices:—Kheri 14; and Bahraich 14½ seers per rupee.

**Punjab.**—Good to heavy rain was received in parts of Hissar, Gurgaon, Delhi, Ambala, Jullundur, Ludhiana, Lahore, Amritsar, Sialkot, Shahpur, Lyallpur and Jhang and moderate to light rain elsewhere. Sowings of autumn crops continue satisfactorily. Standing crops are generally in good condition except unirrigated crops in Sialkot which are withering. Autumn crops have been damaged by insects in parts of Sialkot and Shahpur and by rats in parts of Ferozepore. Damage to melons by excessive moisture is reported from Mianwali. Prices of food grains have risen slightly in some districts. Cattle are generally in good condition. Fodder is sufficient. The canal water-supply is short in the south-western parts of Lyallpur.

**North-West Frontier Province.**—The rainfall was general in all districts, ranging from 3 cents in Tank to 124 cents in Swabi. It was beneficial to standing crops and for cultivation of autumn crops. The condition of crops on the whole is fairly good in Peshawar and average elsewhere. Harvesting of extra spring crops continues in Bannu and the outturn is average both in Bannu and Peshawar. The public health is good. The condition of cattle is fair but disease prevails in two districts. Canal irrigation is satisfactory in Peshawar where the water in rivers is rising. Irrigation from the Paharpur canal in Dera Ismail Khan has been stopped owing to damage by floods. Prices are improving slightly. Prices:—Wheat 10 $\frac{7}{16}$  to 11 $\frac{1}{4}$ ; maize 14 $\frac{5}{16}$  to 16 $\frac{1}{4}$ ; gram 12 $\frac{1}{2}$  to 13 $\frac{1}{2}$ ; *bajra* 12 $\frac{1}{2}$  to 13; and barley 18 $\frac{3}{16}$  seers per rupee.

**Jammu.**—Good rain fell during the week. Prices are stationary. Wheat sells from 10 to 18 and maize from 12 to 20 seers per rupee. The condition of standing crops is fair. Cattle disease of a mild type prevails in two districts. Fodder is sufficient. Insects have damaged crops in Jasmergarh tahsil. Sowing of crops for the autumn harvest is in progress in some parts.

**Kashmir.**—The weather was bright with slight rain which was beneficial for autumn crops. Water has decreased in *nallahs*. The present condition of crops is good, particularly *tilgugloo*, maize and *shali*. Fodder is sufficient. There is no disease among cattle. Prices are unchanged.

**Rajputana.**—The rainfall during the week was good and general throughout. The maximum fall was 952 cents in Ajmer and the minimum 45 cents in Bikaner. Agricultural operations are satisfactory. Standing crops are doing well. Prospects are favourable. Some damage was done to crops in Jaipur by worms. The condition of cattle is good. Pasture and fodder are ample. Prices are generally becoming easier.

**Central India.**—The rainfall during the week was general and sufficient. Weeding of autumn crops is in progress. Land is being prepared for spring crops in Gwalior and Bhopawar. Agricultural stock are satisfactory except for some cattle disease in parts of Gwalior, Indore, Baghelkhand, Bundelkhand and Bhopawar. Prices have fallen slightly in Malwa and Bhopawar and are stationary but high elsewhere.

**Central Provinces.**—The rainfall during the week was plentiful and well distributed. The heaviest falls registered were:—Hoshangabad 9 $\frac{1}{4}$ ; Saugor 8; and Raipur 7 $\frac{1}{4}$  inches. Chanda, Seoni, Balaghat, Jabulpore, Waraha, Akola, Damoh, Chhindwara and Bhandara received from 4 to 5 $\frac{1}{4}$  inches and the remaining districts from 1 $\frac{1}{4}$  in Amraoti to 3 $\frac{1}{4}$  inches in Narsinghpur. A break is required in Wardha, Nagpur and Chanda but more rain is wanted for light soils in Nimar. In a few villages in Bhandara transplanted rice was washed away and small tanks were breached owing to heavy rain. Sowing of *til*, *juar* and *kodon* still continues in Mandla, Seoni, Narsinghpur, Chhindwara, Chanda, Buldana, Yeotmal and the Vindhyan districts but operations have been retarded to some extent by continuous rain in Damoh, Narsinghpur and Chanda. Germination is good except in parts of Buldana where the growth has been stunted by excessive moisture. Transplanting, thinning and weeding are in rapid progress. Preparation of land for sowing of spring crops continues in Damoh, Hoshangabad and the districts of Berar. The supply of fodder and water is adequate. Agricultural stock are in good condition. Prices:—gram became cheaper in Hoshangabad and Amraoti by 1 seer and dearer by 1 $\frac{1}{4}$  seers in Chanda. The price of *juar* fell by 1 seer in Buldana. Elsewhere prices were steady or fluctuated slightly with a tendency to fall.

**Feudatory States.**—The rainfall during the week ranged from 2 $\frac{1}{4}$  inches in Chhui-khadan to 9 $\frac{1}{4}$  inches in Raigarh and was good and well distributed. A break is needed in Sirguja, Kanker, Raigarh and Sakti but more rain is required in Kawardha for thinning operations. Transplantation, thinning and weeding of autumn crops are in full swing. Germination is satisfactory but the growth of cotton in Raj-Nandgaon has been retarded by continuous rain. Insects continue to do some damage in Sakti. Fodder and water are sufficient. Prices:—*Kodon* in Khairagarh and rice in Sakti fell by 2 seers per rupee and rice in Kanker by 1 seer. Prices were steady elsewhere.

**Bombay.**—The rainfall during the week was heavy in parts of Surat, the Konkan, Nasik, Satara, Savantvadi and Kolhapur; good in parts of Karachi, Hyderabad, Thar and Parkar, Ahmedabad, Kaira, Broach, West Khandesh, Poona, Kathiawar, Cutch, Baroda, Mahi Kantha and Rewa Kantha; moderate in parts of the Panch Mahals, East Khandesh and Dharwar; and slight in parts of Sukkur, Larkana, the Upper

Sind Frontier, Ahmednagar, Sholapur and Bijapur. The rainfall was general and beneficial but more is needed for cultivation of autumn crops in parts of Ahmednagar, Poona, Satara, Bijapur and Dharwar. Sowing of autumn crops is nearly completed in parts of Thar and Parkar, Nasik, Poona, Satara, Dharwar, Kathiawar and Rewa Kantha; continues in parts of Sind, Ahmedabad, the Panch Mahals, Kanara, Khandesh, Cutch, Baroda, Mahi Kantha and Savantvadi; and has been retarded owing to excessive rain in parts of Surat. Transplanting has nearly been completed in parts of Poona, Satara and Rewa Kantha and continues in parts of Karachi, Sukkur, Larkana, Ahmedabad, the Panch Mahals, Kaira, Surat and the Konkan. Weeding is in progress in parts of the Panch Mahals, Kaira, Broach, the Konkan, the Deccan, Cutch, Baroda and Savantvadi. Standing crops have been slightly damaged by insects in parts of Bijapur. Crops are suffering in parts of Nasik, Poona and Bijapur owing to insufficient moisture but are generally in good condition elsewhere. Sowing of cotton continues in parts of Ahmedabad, Broach, Baroda and Cutch and has commenced in Kolhapur. The fodder supply is generally adequate. Agricultural stock are sufficient except in parts of Ahmednagar, Poona, Sholapur, Satara and Cutch and are generally in good condition. The supply of drinking water and of water for irrigation are generally adequate. Inundation in Sind is fairly satisfactory but water in canals is insufficient in parts of Larkana, the Upper Sind Frontier and Thar and Parkar. Prices of food grains have fallen slightly in Kanara, Sholapur, Satara and Dharwar; and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 32 to 41 per cent; in Gujarat 17 to 42 per cent; in the Konkan 7 to 33 per cent; in the Deccan 17 to 31 per cent; and in the Karnatak 35 to 38 per cent less than the normal. Stocks of grain are adequate. Labourers get sufficient employment. The cultivating and labouring classes are generally in fair condition. 93 persons received gratuitous relief in Bijapur.

**Hyderabad.**—The rainfall during the week was 2 inches 2 cents. General rain was received. It was good in the Adilabad, Warangal, Nizamabad, Mahbubnagar and Medak districts, the average being more than 2½ inches, and fair in the remaining districts except Usmanabad and Bir where the average is below 75 cents. The highest falls were 4 inches 48 cents in Chinnur in the Adilabad district and 4 inches 42 cents in the Medak taluka of the Medak district. Rain is urgently needed in Kuppal in the Salar Jang Estate where prospects cause anxiety to ryots. Sowings of autumn crops still continue and sowing operations which were suspended in parts of Raichur have been resumed to some extent. The crop is in fair to good condition but is reported to have been damaged by excessive rain in parts of the Aurangabad district and by insects in parts of the Mahbubnagar and Nalgonda districts. Early rice sowings continue. The crop is fair to good. Lands are under preparation for sowing of spring crops. Cattle disease prevails in three talukas. Prices:—wheat 6½; rice 7; and *juar* 14½ seers per rupee. White *juar* is selling in Hyderabad City at 12½ seers per rupee. Yellow *juar* is not available. The highest price in districts is 9 seers in the Kushtagi taluka of the Raichur district and the lowest 24 seers in the Nilanga taluka of the Bidar district.

**Mysore.**—The rainfall during the week was good in Mysore, Hassan and Shimoga and slight elsewhere. Prices of food grains are generally steady and markets are well supplied. Standing crops are in good condition but more rain is needed in some parts of Bangalore, Kolar, Tumkur and Mysore. Prospects of the season are fair. Cattle are generally healthy. Water and fodder are available.

**Coorg.**—The rainfall during the week was 8 inches 37 cents. Transplanting of rice continues. Cattle disease is prevalent in parts. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

**Madras.**—The rainfall during the week was very heavy in South Canara and Malabar; heavy in the Vizagapatam Agency, the Nilgiris and Ganjam; good in Kistna, Godavari, Guntur, Madras and Kurnool; *nil* in Trichinopoly and Madura; and light to fair elsewhere. Irrigation supplies are insufficient in parts of districts except Ganjam, Vizagapatam, Godavari, Kistna, Chingleput, Trichinopoly, Malabar, South Canara and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are generally fair, but some in parts of Kurnool, Bellary, Anantapur, North Arcot, Salem and Coimbatore require more rain and some in parts of Madura are withering. Harvests continue in parts with outturn poor to normal and bumper. Pasture is insufficient in parts of Guntur, the Deccan, Nellore, Coimbatore, Trichinopoly and Tinnevely. Fodder is scanty in parts of Kistna, Guntur, Bellary, Cuddapah and North Arcot. The condition of cattle is generally good. The price of rice is stationary in twelve districts; has fallen in five; and has risen in six. The prices of millets have fluctuated as follows:—*Ragi* is stationary in twelve districts; has fallen in five; and has risen in four. *Cholam* is stationary in seven districts; has fallen in three; and has risen in four. *Cumbu* is stationary in eight districts; has fallen in five; and has risen in two. The public health is generally good. Prospects are generally fair. The condition of the labouring classes is good and employment is available. Grain stocks are generally sufficient.

**Nepal.**—*Report for the quarter ending 15th July 1909.*—The rainfall for the period was 29·96 against 22·22 for the corresponding period of last year.

*April.*—Early rice, pepper and Indian corn were sown, and the second crop of potatoes was harvested. The outturn was good.

*May.*—Wheat and barley were harvested in the hills and valleys; on account of there being no winter rains the outturn was below the average.

*June.*—Plums and peaches began to ripen and the transplanting of rice was begun. Millet was sown in the hills.

*July.*—Plums and peaches were gathered, the outturn being good. Pears and apples have commenced to ripen. The standing crop of maize is in a flourishing condition and a bumper harvest is expected. Transplanting of rice is still going on on high lands. Price of food stuffs continues to be normal. Rainfall very satisfactory.

In the month of June a form of cattle disease which was reported to prove fatal in each case broke out in and around the Nawakot valley which is about 20 miles from the Nepal valley. The disease has since subsided and the exact nature of it has not been ascertained.

Cattle disease is at present prevailing in the Nepal valley but the symptoms are mild and generally confined to affection of the feet.

Statement showing the number of persons in receipt of relief:—

R. W. CARLYLE,

Secretary to the Government of India.

No. 5648-5664—23.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

CUSTOMS.

RESOLUTION.

*Simla, the 4th August 1909.*

His Majesty's Government and the Government of India have recently had under their consideration the question of facilitating the clearance through the Customs Department of samples brought by Commercial Travellers from the United Kingdom into British India, for use as models and patterns for the purpose of obtaining orders, and not for sale, and *vice versa*, and it has been decided that articles liable to duty serving as patterns or samples imported into the one country by Commercial Travellers from the other will be admitted free of duty, subject to the observance of the following regulations.

2. *Regulation governing the admission into British India of samples and patterns brought by Commercial Travellers from the United Kingdom.*

(1) On the production by a Commercial Traveller of a list or declaration containing a full description of every sample brought by him, officially attested by the Customs authorities in the United Kingdom, examination of the samples may be limited to ascertaining that they are fully enumerated on the list produced.

(2) The list referred to in the preceding sub-paragraph is to be utilised in assessing the duty chargeable on the samples. A deposit of the duty is required before delivery of the samples, or alternatively a bond (with sufficient security) for the amount thereof may be accepted instead of a cash deposit.

(3) If the Commercial Traveller is unprovided with the list referred to in sub-paragraph 1, he may be required to produce before the Collector of Customs a certificate or letter of identity from his principals, or otherwise satisfy the Collector of his eligibility for the concession. If the Collector is satisfied on this point, a list will be compiled by the Commercial Traveller giving a full description of every sample sufficient for identification and assessment of the duty chargeable thereon. The duty will be deposited or security given as set out in the preceding sub-paragraph.

(4) Should the samples bear the marks, stamps or seals of the country of exportation, no additional marks or seals for purposes of identification need, as a rule, be affixed by officers of the Customs Department. Contrariwise, if the samples on importation bear no seals, they are to be marked or sealed for future identification, should such a course be deemed necessary by the Customs officers at the port of arrival.

(5) The list of the samples, whether that produced by the Commercial Traveller or that compiled at the port of arrival, will be signed and dated by the officers at the port or place of importation, who will affix to the list a statement bearing the official seal or stamp and showing :—

(a) The name of the port at which the samples are imported and the amount of duty chargeable on the patterns or samples ; also, whether it was deposited in money, or whether security was given.

(b) The marks, if any, that have been applied to the patterns or samples.

- (c) The date upon which the amount of duty deposited will be carried to the public account or the amount recovered under the security given, unless it is proved that the patterns or samples have been previously re-exported or placed in bond. This date is to be not later than twelve months from that upon which the samples were brought into the country.

No charge is to be made for the document issued or certified by the Customs officers or for marking for identification.

- (6) The production of the list referred to in sub-paragraph 1 will not be required in the case of patterns or samples not liable to duty, and the examination of packages containing such patterns or samples will be restricted to ascertaining that no dutiable articles are contained therein and that the goods produced are *bona fide* samples.

All samples of no commercial value are entitled to free entry.

*Exportation of imported samples.*

- (7) Patterns and samples of dutiable articles may be produced to the Customs officers at any port in British India for examination prior to exportation. (Non-dutiable samples are not required to be produced on shipment.)

(8) To obtain the return of the deposit made on entry of the patterns or samples, or the cancellation of the bond entered into, the Commercial Traveller is required to produce with his samples the list thereof, signed by the officers at the port of arrival. Provided that the time allowed for production (see sub-paragraph 5 (c)) has not been exceeded, and the Customs officers are satisfied that the goods as produced are identical with those enumerated on the list, the amount of duty originally deposited will be refunded. The list is to be noted as to the exportation of the samples, the statement referred to in sub-paragraph 5 being retained.

(9) The statement is to be transmitted, with a certificate of exportation of the samples, to the Collector at the port of importation with the object of having an adjustment of accounts effected, where a deposit has been made, or the bond cancelled, as the case may be.

**3. Regulations governing the exportation of samples and patterns, dutiable or non-dutiable, by Commercial Travellers proceeding from India to the United Kingdom.**

(1) Commercial Travellers proceeding to the United Kingdom on business may have their samples sealed and the list thereof officially certified by officers of the Customs Department under the following regulations.

(2) The firm or firms concerned will produce at the Custom House the samples with a list in duplicate containing a full description thereof including quantity and value, and apply to the Collector of Customs for examination of the goods.

In cases where examination and sealing of samples is desired at private premises an application to that effect must be made to the Collector of Customs concerned. The expenses of the Customs officer's attendance for such examination are to be borne by the applicants.

(3) The Collector of Customs, after verifying the list by a comparison with the samples, will have the latter officially sealed or marked, as may be most convenient, and will sign the duplicate list and stamp it with the Custom House seal. This will be returned to the owners of the goods and the original list will be retained for future reference. In regard to the values stated on the list a formal declaration by the Commercial Traveller or by one of the firms concerned may be required if such is considered necessary.

(4) The sealed or marked samples and the certified list must be produced again at the time of shipment to the Customs authorities, who will note on the list that the goods specified therein have actually been shipped.

4. *Regulations prescribed by His Majesty's Commissioners of Customs and Excise for the admission into the United Kingdom of samples and patterns taken by Commercial Travellers from India and certain other countries.*

**DUTIABLE ARTICLES.**

(1) Articles liable to duty serving as patterns or samples introduced into the United Kingdom by Commercial Travellers of the several countries enumerated below are to be admitted free of duty, subject to observance of the following regulations.

(2) On the production by the Commercial Traveller of a list or declaration containing a description of the samples brought by him, officially attested by the proper authority in the country of exportation, examination of the samples may be limited to ascertaining that they are fully enumerated on the list produced.

(3) The list referred to in the preceding sub-paragraph is to be utilised in assessing the duty chargeable on the samples. A deposit of the duty is to be required before delivery of the samples, or alternatively a bond for the amount thereof may be accepted instead of a cash deposit.

(4) If the Commercial Traveller is unprovided with the list referred to in sub-paragraph 2, a list is to be compiled giving a description of the samples sufficient for identification and assessment of the duty chargeable thereon. The duty may be deposited or security given as set out in the preceding sub-paragraph.

(5) Should the samples bear the marks, stamps or seals of the country of exportation, no additional marks or seals for purposes of identification need, as a rule, be affixed by Officers of this Department. Contrariwise, if the samples on importation bear no seals, they are to be marked or sealed for future identification, should such a course be deemed necessary by the Officers at the port of arrival.

(6) The list of the samples, whether that produced by the Commercial Traveller or that compiled at the port of arrival, will be signed and dated by the Officers at the port or place of importation, who will affix to the list a statement bearing an official seal or stamp and showing :—

- (a) The name of the port at which the samples are imported and the amount of duty chargeable on the patterns or samples; also, whether it was deposited in money, or whether security was given.
- (b) The marks, if any, that have been applied to the patterns or samples.
- (c) The date upon which the amount of duty deposited will be carried to the public account, or the amount recovered under the security given unless it is proved that the patterns or samples have been previously re-exported or placed in bond. This date is to be not later than twelve months from that upon which the samples were brought into the country.

No charge is to be made for the document issued or certified by the Officers or for marking for identification.

**NON-DUTIABLE ARTICLES.**

**(a) Gold and Silver Plate liable to Assay.**

(7) The foregoing regulations will also apply to all patterns or samples of Plate :—The deposit to be made or security given is to be approximately equal to the amount of duty formerly chargeable on such articles, *viz.* :—Gold 17s., and Silver 1s. 6d. the oz. troy.

(b) *Other Articles.*

(8) The production of the list referred to in sub-paragraph 2 will not be required in the case of patterns or samples not liable to duty, and the examination of packages containing such patterns or samples will be restricted to ascertaining that no dutiable articles are therein contained and that the goods produced are *bonâ fide* samples.

EXPORTATION OF IMPORTED SAMPLES.

(9) Patterns and samples of dutiable articles and of Plate may be produced to the Customs Officers at any port in the United Kingdom for examination prior to exportation. (Non-dutiable samples are not required to be produced on shipment.)

(10) To obtain the return of the deposit made on entry of the patterns or samples, or the cancellation of the bond entered into, the Commercial Traveller is required to produce with his samples the list thereof, signed by the Officers at the port of arrival. Provided that the time allowed for production (*see* sub-paragraph 6 (c)) has not been exceeded, and the Officers are satisfied that the goods as produced are identical with those enumerated on the list, the amount of duty originally deposited may be refunded forthwith. The list is to be noted as to the exportation of the samples, the statement referred to in sub-paragraph 6 being retained.

(11) The statement is to be transmitted, with a certificate of exportation of the samples, to the Collector at the port of importation with the object of having an adjustment of accounts effected, where a deposit has been made, or the bond cancelled, as the case may be.

(12) In the case of Plate which it may be desired to retain in this country, the samples with relative list and statement are, within the time allowed, to be produced at some Custom House in the United Kingdom with a view to the Plate being assayed as required by law. The usual procedure is to be followed as if the goods were then being imported for the first time, and on completion of the assaying the deposit is to be returned or the bond cancelled.

(13) The facilities set out in the preceding sub-paragraphs are to be granted to Commercial Travellers from the following countries :—

Belgium, Switzerland, France, United States of America, Germany, Italy, British South Africa, New Zealand, India.

ORDER.—Ordered, that a copy be forwarded to the Government of  
 Bombay, Revenue Department  
 Madras, Revenue Department  
 Bengal, Financial Department  
 Burma, Revenue Department  
 Eastern Bengal and Assam, Financial Department  
 for information and the issue of necessary instructions to the Customs authorities.

Ordered, also, that a copy be forwarded to the other Local Governments and Administrations, for information.

Ordered, also, that a copy be forwarded to the Director-General of Commercial Intelligence, for information.

Ordered, also, that the Resolution be published in the Supplement to the *Gazette of India*, for general information.

B. ROBERTSON,

Secretary to the Government of India.

C. F. ANDERSON, Capt., R.E.,  
for Secretary, Railway Board.

(b) Opened from 2nd May 1909.

(c) From 1st July 1908.

Simla, the 5th August 1909.

*Printed and published for the GOVERNMENT OF INDIA at the GOVERNMENT CENTRAL PRINTING OFFICE, Simla.*

SUPPLEMENT TO  
**The Gazette of India.**

No. 33.]

CALCUTTA, SATURDAY, AUGUST 14, 1909.

**OFFICIAL PAPERS**

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the Gazette may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.  
DEPARTMENT OF REVENUE AND AGRICULTURE.

**Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 12th August 1909, based on the Indian Daily Weather Reports of the period.**

At the beginning of the week rain was falling in Burma, northeast India, the United Provinces, the submontane districts of the Punjab, the central parts of the country, on the east and west coasts of the peninsula and in south India. Rainfall continued throughout the week in the first two areas and in Madras, but the Arabian Sea monsoon current became inactive and, as the position of the trough of low pressure prevented a westward extension of the Bay current, rainfall in consequence gradually disappeared from the rest of the country.

The rainfall of the week was heavier than usual in Eastern Bengal and Assam, the province of Bengal (excluding Orissa), the United Provinces, Mysore, the southeast of Madras and on the north Madras coast.

*Burma.*—Rainfall was general on the coast and in the extreme north and local elsewhere. Cloud was moderate to heavy and temperature was normal.

*Northeast India, including Orissa.*—Rainfall occurred in all parts of the division, but was only light and local in Orissa. Skies were moderately to heavily clouded. Temperature was normal or in defect.

*The United Provinces, Central India and the Central Provinces.*—Widespread rain was reported on the first three days of the week from the United Provinces, but for the rest of the week rainfall was confined to the Himalayas and the submontane districts. In the Central Provinces and Central India the week was almost rainless. On most days skies were lightly to moderately clouded. Temperature in the daytime was in defect in the United Provinces.

*Northwest India.*—The rainfall of the week consisted chiefly of local showers in the Punjab and Kashmir. Cloud was moderate to heavy in the south and east of the division and clear or lightly clouded elsewhere. Temperature was lower than usual in Rajputana.

*The Peninsula.*—Rainfall was local and generally light in the western districts, but it was heavier than usual in Mysore, the southeast of Madras and on the north Madras coast. Skies were moderately clouded. Temperature was approximately normal.

The following summarises the chief rainfall amounts as reported at 8 hrs. each day:—

August 6th. Chittagong 3'00", Bogra 3'22", Patna 2'83" and Meerut 5'18".

„ 7th. Akyab 5'00", Dibrugarh 2'78", Jessore 2'12" and Burdwan 2'90".

„ 8th. Akyab 3'96" and Myitkyina 2'76".

- 
- August 9th. Sibsagar 2'94", Chittagong 8'02", Mymensingh 5'36" and Dehra Dun 7'30".
- " 10th. Jalpaiguri 2'90", Bahraich 4'08" and Dehra Dun 6'65".
- " 11th. Chittagong 4'91" and Barisal 3'14".
- " 12th. Moulmein 7'70".

The rainfall of the period from the 30th April to the 12th August is 20 per cent or more in defect in Chota Nagpur, the southwest of the Punjab, Baluchistan, Berar and the Madras Deccan; and is 20 per cent or more in excess in Bihar, the east of the United Provinces, the North-West Frontier Province, Rajputana and the south of the peninsula.

Division.	RAINFALL DATA FOR WEEK ENDING ON 12TH AUGUST 1909.			RAINFALL DATA FROM 30TH APRIL 1909 TO 12TH AUGUST 1909.

GEORGE C. SIMPSON,  
for Director-General of Observatories.  
R. W. CARLYLE,  
Secretary to the Government of India.

SIMLA,  
The 12th August 1909.

## WEATHER IN INDIA DURING JUNE AND JULY.

1. (a) The monsoon appeared about a week before its normal date over the Bay and advancing inland with the usual rapidity was established over the whole of northeast India and the United Provinces between the 6th and the 8th of June.

The Bombay current arrived about the normal date, but did not penetrate inland in full strength until nearly the end of the month. The rainfall of June was in marked excess of the average in the field of the Bay current, and about normal in the region served by the Arabian Sea current.

In July the Bay current was fairly strong but was on the whole determined more largely than usual on the one hand to Burma and on the other to the Gangetic plain and the Punjab, with the result that the intervening region of northeast India obtained less than its average supply of rainfall. The Bombay monsoon was unusually active and gave abundant rainfall over a large part of its field.

(b) The aggregate precipitation of June and July in the plains of India, was 13 per cent. in excess of the normal, as compared with 2 per cent. in the corresponding period of last year. The local distribution also was on the whole more favourable, the rainfall being above the normal in all the larger provinces with the exception of Central India, the Central Provinces and Mysore.

2. The following tables give for June, July, and the total period the actual rainfall, the departure from normal and the percentage departure from normal for the chief political divisions and sub-divisions:—

Division.	JUNE.			JULY.			PERIOD, JUNE AND JULY.		
	Actual, 1909.	Departure from normal.	Percentage departure from normal.	Actual, 1909.	Departure from normal.	Percentage departure from normal.	Actual, 1909.	Departure from normal.	Percentage departure from normal.

## ANTICIPATIONS FOR AUGUST AND SEPTEMBER 1909.

3. The data of the past thirty-four years show that the meteorological conditions in certain areas tend to vary with the abundance and distribution of the monsoon rainfall of India. Data referring to the period previous to June 1909 were published in the memorandum of the 8th June; and the information obtained since that time is as follows:—

## (a) THE ARGENTINE REPUBLIC AND CHILI.

4. The monthly departures of pressure at Buenos Ayres were +.6 m.m. in June and +2.5 m.m. in July. At Santiago the corresponding departures were +1.0 m.m. and +.9 m.m.

## (b) AUSTRALIA.

5. The average pressure of a number of representative stations was normal in June and in defect in July by .01°.

## (c) THE INDIAN OCEAN.

6. *Mauritius*.—Pressure was below the average by .04° in June and .03° in July. The air movement was of the normal character in June, but was somewhat more easterly and feebler than usual in July. Rainfall was in decided excess in both months.

*Zanzibar*.—Pressure was approximately normal, being only .01° in defect in both June and July. Winds were on the whole stronger and more westerly than usual. Rainfall was unusually scanty in June (87 per cent. in defect) and about the average in July.

*Seychelles*.—Pressure was identical with the average in both months. Winds varied considerably in strength from week to week, particularly in July, but were on the whole below the normal in intensity. The feebleness was most marked in the week ending on July 3rd when the direction also was very variable. The direction was unusually southerly in June and about normal in July. Rainfall was barely half of the normal quantity.

*Logs of vessels*.—The marine information available at present relating to the Indian Seas and the equatorial belt is very scanty. It however indicates that the only striking abnormalities in the character of the air movement were (a) the prevalence of light unsteady winds over the central portion of the equatorial belt during the second and third weeks of June and (b) of unusual east to northeast winds to the northeast of the Seychelles on the 2nd and 3rd of July. The decrease in the intensity of the winds over the Arabian Sea reported by the mail steamer in the fourth week of June and the diminution in the rainfall in India due to this monsoon current between the 15th and 26th were almost certainly related to the condition (a).

## (d) NORTHEAST AFRICA.

7. The first rise of the Nile took place very early, but the river rose very slowly during June and the first half of July owing to deficiency of monsoon rainfall in Abyssinia and consequent lowness in the Blue Nile. The latest telegram shows however that the Blue Nile is now high.

## (e) INDIA.

8. *Pressure*.—The charts of average pressure for June and July show no very unusual features.

## (f) SNOWFALL IN THE MOUNTAIN REGIONS TO THE NORTH AND WEST OF INDIA DURING JUNE AND JULY.

9. (a) According to the limited information available hardly any snow fell during June and July on the mountain ranges of the North-West Frontier Province. Weather was of the usual character in south Waziristan.

(b) Occasional light falls occurred in Kashmir, but none of these extended down to the level of the observing stations. The ranges near Leh are said to be covered with recent snow.

(c) There were four falls in July on the Droti peak in Chamba down to about 13,000 feet. The total amount received measured about 2 feet in depth.

In the Simla Hills a snowstorm occurred on the 13th July giving 9 inches of snow on the Shatul pass and a few inches on the Rupin pass.

(d) In Garhwal there were some falls on the higher peaks: the total amount was however below the normal. In Almora about 7 feet of snow fell during the first three weeks of July on the Nuwe pass and amounts varying from 2 to 6 inches in other parts.

#### INFERENCES.

10. As previously pointed out there is a relation of an inverse character between pressure in South America and in the Indian Ocean, the barometer being usually higher than the average in the one region when lower in the other: and abundant monsoon rainfall is as a rule preceded by high pressure in South America and low pressure in the Indian Ocean. The pressure data of the past four months have been collected together in the following table:—

*Pressure departures from normal in inches.*

		South America.	Mauritius.	Seychelles.	Zanzibar.	Australia.
April	... ..	+ '03	— '01	— '01	+ '01	— '03
May	... ..	+ '05	— '01	'00	+ '01	— '03
June	... ..	+ '03	— '04	'00	— '01	'00
July	... ..	+ '07	— '03	'00	— '01	— '01

It will be seen that the conditions during April and May, upon which the favourable anticipations of June were based, have been fully maintained during June and July.

Monsoon rainfall is also largely influenced by the average pressure over India during the year ending with the previous December. In the present case, however, this pressure was normal and no effect can be anticipated.

Another factor which may produce important results is that of excessive snowfall. But the information available indicates that during the past two months little or no snow fell in the mountain zone bordering upper India on the west, and also that the falls in the western Himalayas were not on the whole abnormal in character. Further, as the previous snowfall was by no means excessive, it is clear that there are at present no abnormal accumulations such as existed in 1907.

The data regarding winds in the Indian Ocean show that there were two short periods of unfavourable conditions; but it appears that their influence did not persist and may probably be neglected at the present time. Almost the only disturbing symptom is the manner in which pressure has been oscillating at Mauritius, which suggests that the bigger air movements may be less steady than usual.

#### SUMMARY.

- (a) The general conditions remain decidedly favourable and it may be expected that the total amount of rainfall in August and September will exceed the average.
- (b) There are no marked indications of abnormality in the geographical distribution of rainfall.

SIMLA;

The 6th August 1909.

GILBERT T. WALKER.

Director-General of Observatories.

R. W. CARLYLE,

Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,  
7th August 1909.

**Burma.**—The rainfall during the week was general in Lower Burma; heavy in the Arakan division and the Sittang valley; and normal elsewhere. In Upper Burma no rain fell in several dry zone districts, and in other parts of the dry zone and in Katha showers were light. Elsewhere the rainfall was good but in the wet districts on the northern border the rainfall to date is considerably below the normal. Ploughing for the main rice crop in Lower Burma is approaching completion and transplanting is making good progress. In Upper Burma cultivation of autumn crops is progressing satisfactorily. Prospects of standing crops are generally good but heavy floods in the Sittang valley have damaged the main crops on a large area in the Pegu district and some damage from floods on a small scale in the Irrawaddy valley is also reported from Tharrawaddy. Prices of unhusked rice are stationary and normal at the principal seaports. In the interior, prices have risen in two districts and have fallen in three districts and are ordinarily normal.

**Eastern Bengal and Assam.**—The weather was rainy and seasonable in the Dacca and Chittagong divisions, with very heavy rain in Chittagong. In the rest of the Province the weather was showery and seasonable but the rainfall was generally lighter. Malda, Nowgong and Manipur require more rain for transplanting winter rice. Prospects of jute are generally good and cutting and steeping are in progress. Prospects of autumn rice are generally good. The recent rain has facilitated transplantation of winter rice. The condition of tea shows some improvement. The number on gratuitous relief in Rangpur was 5. The average price of common rice is stationary. Cattle disease is prevalent in some districts.

**Bengal.**—The rainfall during the week was heavy in most parts of Lower Bengal and Bihar and in Darjeeling and Cooch Behar and moderate in Orissa and Chota Nagpur. The rain has done good to standing crops and has also facilitated transplantation of winter paddy. More rain is however still reported to be wanting in Hazaribagh and in parts of Burdwan, Bankura, Hooghly, Murshidabad, Purnea and Angul. All standing crops are said to be good but some damage has been done by the recent heavy rain to paddy in Jessore and Khulna and to *makai* in Patna, Monghyr and Palamau. Insects are doing injury to jute in parts of Nadia. The price of common rice has risen slightly in Howrah, Jessore, Purnea and Manbhum and has fallen in Nadia, Murshidabad, Patna, Gaya, Shahabad, Saran, Cuttack, Hazaribagh, Ranchi and Palamau. Cattle disease is reported from several districts. The supply of fodder and water is sufficient throughout the Province.

**United Provinces.**—Rain fell throughout the Provinces, being heaviest in the eastern sub-montane districts. Late sowings continue. Transplantation of late rice and weeding are in progress. Early autumn crops are being harvested in many places. Standing crops are in good condition almost everywhere but a break in the rains is needed. The condition of agricultural stock is good. Cattle disease is reported from twenty-eight districts. Markets are well supplied. Prices are generally stationary.

The weekly report on the famine and scarcity is as follows:—The labouring and cultivating classes are in good condition. Distribution of gratuitous relief is in progress in Kheri and Bahraich. The numbers reported include those in receipt of valedictory doles in Mirzapur and Garhwal and workers who received a final dole in Bahraich. The numbers on Government relief are :—on gratuitous relief 18,001; on poorhouse relief in Bahraich 18; total on relief 18,019. Prices:—Kheri 14 and Bahraich 14½ seers per rupee.

**Punjab.**—Heavy rain fell in the sub-montane tracts and good to moderate rain in the other districts of the Province except Ferozepore and Jhang, the poorest falls having been recorded in the south-western districts. Sowings of autumn crops continue satisfactorily. Standing crops are generally in good condition but more rain is wanted in Delhi owing to westerly winds. Crops have been damaged by grasshoppers in parts of Ambala and Sialkot and by insects in parts of Shahpur. Maize has been damaged by excessive rain in Ambala and rats are damaging the crops in parts of Ferozepore. Considerable damage to extra spring crops by floods has been reported in the Kacha tract of Mianwali. Prices are generally unsettled but there is a slight downward tendency noticeable in parts of the Delhi and Lahore divisions. Cattle are generally in good condition. Fodder is sufficient. There is a general complaint of a short canal supply in tahsils Toba Tek Singh and Samandri of the Lyallpur district. The canal was closed in Delhi.

**North-West Frontier Province.**—The rainfall during the week ranged from 25 cents in Swabi to 1 inch 83 cents in Mardan and was beneficial to standing crops and for sowings of autumn crops. The condition of crops is average except on unirrigated lands in the Charsadda tahsil of Peshawar where it is poor. Harvesting of extra spring crops continues in Bannu and the outturn is average both in Bannu and Peshawar. The public health is good but slight fever is reported in the Charsadda tahsil. Cattle disease is prevalent in some villages of the Bannu tahsil. Some deaths occurred amongst cattle in the Dera Ismail Khan tahsil. Fodder is sufficient. Canal irrigation is satisfactory in Peshawar where rivers are rising. Prices are fluctuating. Prices:—wheat 10½ to 11½; maize 13½ to 16½; gram 12½ to 15; *bajra* 12½ to 13; and barley 18½ seers per rupee.

**Jammu.**—Good rain fell during the week. Prices are stationary. Wheat sells from 10 to 18 and maize from 14 to 20 seers per rupee. The condition of standing crops is fair. Cattle disease of mild type is reported from two districts. Fodder is sufficient. Sowing of crops for the autumn harvest is still in progress in some parts.

**Kashmir.**—The weather was bright and hot except for slight rain. Water is decreasing in *nallahs*. Crops are in good condition. The condition of fodder is average. There is no disease among cattle. Prices are unchanged.

**Rajputana.**—Rain fell throughout the Agency. The maximum fall was 501 cents in Partabgarh and the minimum 19 cents in Jodhpur. Standing crops and prospects are, on the whole, good. Crops have been damaged in Mewar and Ajmer by excessive rain and in parts of Jaipur and Tonk by worms. The condition of cattle is good. Pasturage and fodder are ample. Prices generally continue becoming easier.

**Central India.**—The rainfall during the week was general but more is needed in parts of Indore. Sowing and weeding of autumn crops continue. Land is being prepared for spring crops in Gwalior, Baghelkhand and Bhopawar. Crops have been damaged by heavy rain in parts of Malwa. Agricultural stock are satisfactory except for some cattle disease in parts of Gwalior, Indore, Baghelkhand, Bundelkhand and Bhopawar. Prices have fallen slightly in Indore and Malwa and are stationary but high elsewhere.

**Central Provinces.**—During the week 2½ inches of rain fell in Balaghat and 1 inch in Mandla. Elsewhere the quantity registered measured from 9 cents in Seoni to 60 cents in Buldana. The outlying tahsils of Jubbulpore, Seoni and Yeotmal had some heavy showers. The break and the sunshine which accompanied it were welcome and facilitated weeding and the later autumn sowings. More rain is wanted in Amraoti and in parts of Chhattisgarh. Thinning and transplantation are in rapid progress and in some places they are nearing completion. The condition of standing crops is good. Preparation of land for sowing of spring crops is in progress in Saugor, Jubbulpore, Seoni, Narsinghpur, Chhindwara and the districts of Berar. Fodder and water are sufficient. Cattle are doing well. The price of wheat remained stationary in thirteen districts; *juar* and gram in sixteen; and rice in twenty districts. *Yar* fell in Chhindwara and Chanda by 1 and 1½ seers per rupee respectively. Prices of staple food grains elsewhere fluctuated slightly with a tendency to fall.

**Feudatory States.**—During the week light to moderate rain fell in ten States ranging from 27 cents in Chhuikhadan to 6½ inches in Jashpur. More rain is needed in Kawardha and Raj-Nandgaon to facilitate thinning operations. Sowing of *kutki*, *til*, rice and pulses are still in progress in Chhuikhadan, Raj-Nandgaon, Kanker, Sirguja and Jashpur. Transplantation, thinning and weeding of autumn crops continue. Germination is good. Insects are still doing injury to crops in Sakti. Preparation of land for sowing of spring crops is in progress in Kawardha, Chhuikhadan, Raj-Nandgaon, Saranagarh and Jashpur. The supply of fodder and water are adequate. Prices:—rice became dearer by one seer per rupee in Raigarh and Sakti. Prices were steady elsewhere.

**Bombay.**—The rainfall during the week was heavy in parts of Ahmedabad, the Panch Mahals, the Konkan, Nasik, Palanpur, Mahi Kantha, Rewa Kantha, Savantvadi and Kolhapur; good in parts of Thar and Parkar, Surat, Kathiawar and Baroda; moderate in parts of Hyderabad, Khandesh, Poona, Satara, Belgaum and Cutch; and slight in parts of Karachi, the Upper Sind Frontier, Broach, Ahmednagar, Sholapur, Bijapur and Dharwar. The rainfall was general and beneficial but more is needed for autumn crops in parts of the Deccan and the Karnatak. Sowing of autumn crops has been completed in Thar and Parkar, Satara and Dharwar; it is nearly over in East Khandesh, Nasik, Poona, Bijapur, Belgaum and Kathiawar and continues elsewhere. Transplantation has been completed in Colaba and Satara; it is nearly over in Larkana, Thana, Ratnagiri and Poona and continues in parts of Karachi, Sukkur, Ahmedabad, the Panch Mahals, Kanara, Belgaum and Rewa Kantha. Weeding is in progress generally. Standing crops are suffering in parts of Poona, Ahmednagar and Bijapur owing to insufficient rain. They have been slightly damaged by rats or insects in parts of Karachi, Hyderabad, the Upper Sind Frontier, Poona and Belgaum and by flood in parts of Ahmedabad and are generally in good condition elsewhere, especially in Gujarat and the Konkan where a break in the rains would be beneficial. Sowing of cotton continues in parts of Ahmedabad, Broach, Surat, Baroda and Cutch. The fodder supply is generally adequate. Agricultural stock are sufficient except in parts of Ahmednagar, Poona, Sholapur, Satara and Cutch and are generally in good condition. The supply of drinking water and of water for irrigation are generally adequate. Water is insufficient in some canals in Sind. Prices of food grains have fallen slightly in Ahmedabad, the Panch Mahals, Surat, Kanara, East Khandesh and Poona; have risen slightly in Satara; and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 31 to 41 per cent; in Gujarat 14 to 40 per cent; in the Konkan 5 to 35 per cent; in the Deccan 13 to 28 per cent; and in the Karnatak 27 to 38 per cent less than the normal. Stocks of grain are adequate. Labourers get sufficient employment. The cultivating and labouring classes are generally in fair condition. There are 93 persons on gratuitous relief in Bijapur.

**Hyderabad.**—The rainfall during the week was 1 inch 35 cents. Rain fell during the week throughout the Dominions. It was good in the Aurangabad, Adilabad, Nizamabad, Nander and Parbhani districts; fair to poor elsewhere; and very poor in the Raichur district where the average is 16 cents. The highest falls were 3 inches 89 cents and 3 inches 92 cents respectively in the Aurangabad and Bhokardan talukas of the Aurangabad district and 3 inches 76 cents and 3 inches 71 cents in the Nirmal and Adilabad talukas respectively of the Adilabad district. Kuppal in the Salar Jang Estate received only 44 cents which has proved beneficial but more rain is urgently required. Sowings of autumn crops are still in progress in parts. The crop is reported to be withering in the Raichur district and seedlings are badly in need of rain. The crop is fair to good elsewhere except in parts of Aurangabad where it has been damaged by excessive rain and in parts of the Nalgonda and Mahbubnagar districts where it has been damaged by insects. Lands are being prepared for spring crops in most districts and early rice is also being sown. The crop is fair to good generally. Cattle disease and fodder scarcity are reported in five and two talukas respectively. Prices:—wheat 6½; coarse rice 7½; and *juar* 14½ seers per rupee. White *juar* is selling in Hyderabad City at 12½ seers per rupee. Yellow *juar* is not available. The highest price in districts is 9 seers in the Kushtagi taluka of the Raichur district and the Adilabad taluka of the Adilabad district and the lowest 25 seers in the Udgir taluka of the Bidar district.

**Mysore.**—The rainfall during the week was good in Bangalore, Kolar, Kadur and Shimoga; fair in Tumkur, Mysore and Hassan; and slight in Chittaldroog. Prices of food grains are generally steady and markets are well supplied. Standing crops are in good condition. Prospects of the season are fair. Cattle are generally healthy. Water and fodder are available.

**Coorg.**—The rainfall during the week was 2 inches 57 cents. Progress in transplanting rice is satisfactory. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient. Cattle disease prevails in parts.

**Madras.**—The rainfall during the week was very heavy in South Canara and Malabar; heavy in the Nilgiris; good in North Arcot, Salem, Cuddapah, Nellore, Godavari, Kurnool, Trichinopoly and South Arcot; and light to fair elsewhere. Irrigation supplies are insufficient in parts of districts except Vizagapatam, Godavari, Kistna, Chingleput, Coimbatore, Trichinopoly, Malabar, South Canara and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are generally fair, but some in parts of Kurnool, Bellary, Anantapur, North Arcot, Coimbatore and Tinnevely require more rain and some in parts of Madura are withering. Harvests continue in parts with outturn poor to normal and bumper. Pasture is insufficient in parts of Guntur, Bellary, Cuddapah, Nellore, Coimbatore and Tinnevely. Fodder is scanty in parts of the Circars, Bellary, Cuddapah, North Arcot and Coimbatore. The condition of cattle is generally good. The price of rice is stationary in nine districts; has fallen in eight; and has risen in six. The prices of millets have fluctuated as follows:—*Ragi* is stationary in eleven districts; has fallen in six; and has risen in four. *Cholam* is stationary in nine districts; has fallen in four; and has risen in one. *Cumbu* is stationary in ten districts; has fallen in three; and has risen in two. The public health is generally good. Prospects are generally fair. The condition of the labouring classes is good and employment is available. Grain stocks are generally sufficient.

GOVERNMENT OF INDIA.  
DEPARTMENT OF REVENUE AND AGRICULTURE.

FAMINE.

Statement showing the number of persons on relief works and in receipt of gratuitous relief in the Districts and Native States affected by famine or scarcity in India—(District details).

NOTE.—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the corrected details of totals reported in the telegraphic famine reports published weekly in the Supplement to the Gazette of India.

Non-labouring children and other dependants of relief workers are classed under relief works when distinguished in the local returns. Persons gratuitously relieved in poor-houses or in their houses. Weavers relieved in their own trade are shown under "village doles or other relief."

FOR THE WEEK ENDING SATURDAY, THE 30th JULY 1900.

C. F. ANDERSON, Captain, R.E.,  
for Secretary, Railway Board.

*Printed and published for the GOVERNMENT OF INDIA at the GOVERNMENT CENTRAL PRINTING OFFICE, Simla.*

SUPPLEMENT TO  
**The Gazette of India.**

No. 34.} SIMLA, SATURDAY, AUGUST 21, 1909.

**OFFICIAL PAPERS**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

**GOVERNMENT OF INDIA.**

**DEPARTMENT OF REVENUE AND AGRICULTURE.**

**Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 19th August 1909, based on the Indian Daily Weather Reports of the period.**

Both branches of the monsoon current were inactive on most days of the week and rainfall was in consequence below the average over Burma, nearly the whole of northern India and the greater part of the peninsula. The only divisions which received the normal quantity of rain were the Stations in the Bay, Assam, Bengal proper, Chota Nagpur, south Hyderabad, Mysore, the Madras Deccan and the north Madras coast. Practically no rain fell in northwest India (excluding the east and north Punjab), Central India and the west of the Central Provinces.

*Burma.*—The central districts received very little rain, but over the rest of the province rainfall was widespread though not heavy. Skies were moderately clouded. Normal temperature conditions prevailed.

*Northeast India, including Orissa.*—During the first part of the week rainfall occurred chiefly in Eastern Bengal and Assam and during the second part in the province of Bengal. Skies were moderately to heavily clouded over the greater part of the division. Temperature was approximately normal.

*The United Provinces, Central India and the Central Provinces.*—At the end of the week light rain was fairly widespread in the east of the Central

Provinces, but the rainfall on most days consisted of only a few scattered falls which occurred principally along the central Himalayas. Skies were clear or lightly to moderately clouded over the greater part of the division. Temperature was normal or in excess.

*Northwest India.*—Rain fell locally along the Himalayas and in the vicinity of Mount Abu. Skies were clear or only lightly clouded, except in parts of Rajputana and of Gujarat and along the Punjab Himalayas, where cloud was moderate to heavy. Temperature was in defect in Rajputana.

*The Peninsula.*—Very little rain was received on the west coast, in the north of the Deccan and in southeast Madras, but rain fell in all other parts of the peninsula. Skies were lightly to heavily clouded. Temperature was nearly normal.

The following summarises the chief rainfall amounts as reported at 8 hrs. each day:—

- August 13th. Port Blair 3'93", Tavoy 3'27", Moulmein 6'83", Akyab 3'85", Silchar 2'21" and Murree 2'81".
- „ 14th. Murree 2'26" and Masulipatam 2'00".
- „ 15th. Saugor Island 4'06", Dehra Dun 2'09", Chakrata 2'35" and Raichur 1'83".

GEORGE C. SIMPSON,

for Director-General of Observatories.

R. W. CARLYLE,

Secretary to the Government of India.

SIMLA,

The 19th August 1909.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,  
14th August 1909.

**Burma.**—Heavy rain fell during the week in the Arakan and Tenasserim divisions and in the northern border districts and moderate rain elsewhere except in Myingyan where there was no rain. Ploughing for the main rice crop in Lower Burma is nearly completed and transplanting is in progress. Cultivation of autumn crops in Upper Burma is progressing. Crop prospects are unchanged. The local estimate of the damage done by the Sittang floods now reduces the area of complete destruction from 80 to 10 thousand acres. Floods are subsiding and Government officers are being directed towards recultivation. Prospects are regarded as not quite hopeless. The price of unhusked rice has risen slightly in Rangoon, Mandalay and two other districts and has fallen considerably in Bhamo.

**Eastern Bengal and Assam.**—The weather during the week was hot but was attended with light showers in Rajshahi and Dinajpur; it was rainy and seasonable in the rest of the Province. The rainfall was heavy in the Dacca and Chittagong divisions. Slight damage was done to autumn rice by floods in the Dacca and Mymensingh districts. Jute and autumn rice are being harvested; the former promises a good, and latter a fair, outturn. The condition of tea is good. Transplantation of winter rice continues. Only 7 persons are on gratuitous relief in Rangpur. The average price of common rice is practically stationary. Cattle disease is reported from several districts.

**Bengal.**—Rain was general all over the Province. The fall was heavy in Darjeeling, Cooch Behar (and in parts of Nadia and Khulna; moderate in Howrah, Jessore, Champaran and Muzaffarpur; and light elsewhere. More rain is wanted in parts of the 24 Parganas, Murshidabad, Purnea, Angul, Hazaribagh and Singhbhum. Transplantation of winter rice continues. Harvesting of winter rice continues. Harvesting of autumn paddy and jute has commenced. The condition of standing crops is generally fair but they have been damaged to some extent by heavy rain in Jessore, Khulna and Darjeeling and by floods in Champaran. The price of common rice has risen in Nadia, Angul and Ranchi and has fallen in Burdwan, Birbhum, Jessore, Patna, Gaya, Champaran, Darbhanga, Cuttack, Balasore, Sambalpur and Manbhum and in the Bhagalpur Division excepting Darjeeling. Cattle disease is reported from several districts. The fodder and water supply is sufficient.

**United Provinces.**—Heavy rain fell in the hills and sub-montane districts and little or no rain in the western districts and Bundelkhand. A break would be beneficial. But rain is now required in several districts. The condition of standing crops is good except in some flooded areas. Weeding and preparation of fields for spring crops are in progress. Early autumn crops are being harvested. The condition of cattle is generally good but twenty-nine districts report cattle disease. Markets are well supplied. Prices are generally stationary.

\* The weekly report on the famine and scarcity is as follows:—The condition of people is good but fever is prevalent in parts of Kheri and Bahraich. Gratuitous relief continues in Bahraich. The numbers reported include those in receipt of valedictory doles in Mirzapur, Garhwal and Kheri and workers who received a final dole in Bahraich. The numbers on Government relief are:—on gratuitous relief 18,009; on poorhouse relief in Bahraich 15; total 18,024. Prices:—Bahraich 14½ seers per rupee.

**Punjab.**—The weakness of the monsoon was more pronounced during the week. The rainfall was chiefly confined to the sub-himalayan districts and was light to moderate in quantity. Sowings of autumn crops continue satisfactorily. Standing crops are generally in good condition but more rain is needed in several districts. Crops have been injured to some extent in Rohtak and Delhi owing to westerly winds and want of rain.

Crops have been damaged by insects in parts of Rohtak; by grass-hoppers in parts of Ambala, Shahpur and Sialkot; and by rats in parts of Ferozepore. Prices of food grains have risen slightly in Hissar and Rohtak but are generally in an unsettled condition throughout the Province. Cattle are generally in good condition. Fodder is sufficient. The canal was closed in Delhi and complaints of a short water supply are still being received in tahsils Toba Tek Singh and Samandri of the Lyallpur district.

**North-West Frontier Province.**—Rain fell in all districts except Bannu, ranging from 2½ cents in Charsadda to 8 inches 63 cents in Swabi. The rain was beneficial to standing crops and for cultivation of autumn crops. The condition of crops is average in Dera Ismail Khan and fairly good in Peshawar except in the Charsadda tahsil where it is poor on unirrigated lands. The outturn is average both in the Bannu and Peshawar tahsils. Slight fever is reported in the Charsadda tahsil of Peshawar. Otherwise, the health of people is good. Cattle disease is reported from six villages of the Nawshera tahsil of Peshawar. Fodder is sufficient. Canal irrigation is satisfactory in Peshawar where rivers are rising. Irrigation from the Paharpur canal has been stopped. Prices are stationary in Peshawar and fluctuating in Bannu and Dera Ismail Khan. Prices:—wheat 10½ to 11½; maize 13½ to 16½; gram 13 to 15; *bajra* 11 to 13½; and barley 18½ seers per rupee.

**Jammu.**—Good rain fell during the week. Prices are stationary. Wheat sells from 10 to 18 and maize from 12 to 20 seers per rupee. The condition of standing crops is fair. Cattle disease of mild type is prevalent in two districts. Fodder is sufficient. Sowing of crops for the autumn harvest is still in progress in some parts.

**Kashmir.**—The weather was bright except for very slight rain which did good to crops. The condition of crops is good and that of fodder average. There is no disease among cattle. Prices are almost unchanged.

**Rajputana.**—Showers of rain fell during the week at places. Rain is wanted in Alwar and Dholpur. Standing crops and prospects are good. Damage to crops by insects is reported from Mewar, Tonk and Kishengarh and to maize in Partabgarh by excessive rain. The condition of cattle is good except in parts of Mewar. Pasturage and fodder are ample. Prices are rising in Kishengarh, Marwar and Jhalawar and are steady or falling elsewhere.

**Central India.**—The rainfall during the week was *nil* in Bundelkhand; partial in Bhopal; and general elsewhere. Sowing and weeding of autumn crops continue. Land is being prepared for spring crops in Gwalior, Indore, Bhopal, Baghelkhand and Bhopawar. Crops have been slightly damaged in parts of Malwa. Agricultural stock are satisfactory except for some cattle disease in parts of Gwalior, Indore, Bhopal, Baghelkhand, Bundelkhand and Bhopawar. Prices have fallen slightly in parts of Malwa and Bhopawar and are high but stationary elsewhere.

**Central Provinces.**—No rain fell during the week in the Vindhyan, Nerbadda Valley and Satpura districts and in Bukhana. Drug, Raipur and the outlying tracts of Narsinghpur received fairly good rain not exceeding 2½ inches. Elsewhere the quantity registered ranged from 4 cents in Akola to 76 cents in Bilaspur. The break in the rains has considerably benefited crops and facilitated agricultural operations but rain is now needed especially for the rice crop. Weeding, thinning, transplanting and preparation of land for sowing of spring crops continue. Transplantation was retarded to some extent for want of rain in Bhandara and Balaghat. Standing crops are at present in good condition. Grasshoppers did slight damage to rice in parts of Baloda bazar in Raipur. The supply of fodder and water is adequate everywhere. Agricultural stock are in good condition. Prices remained almost stationary during the week. Rice became cheaper in Bilaspur by ½ seer and *juar* became dearer in Nimar, Chhindwara and Wardha by 1½ seers. Gram fell in Mandla and Hoshangabad by 1½ and 2½ seers and rose in Amraoti and Chanda by 1 and 1½ seers per rupee.

**Feudatory States.**—Rain is reported from nine States, ranging from 6 cents in Raj-Nandgaon to 3½ inches in Jashpur. More rain is required for thinning operations in Kawardha, Chhuikhadan, Khairagarh and Raj-Nandgaon and for rice and *kodon* on light soils in Kawardha and Raj-Nandgaon. So far the condition of crops is good. Transplantation, thinning and weeding are in progress. Preparation of land for sowing of spring crops continues in Kawardha, Chhuikhadan, Raj-Nandgaon, Sarangarh and Jashpur. Fodder and water are sufficient. The price of rice in Raj-Nandgaon rose by 1½ seers and fell in Kanker by 1 seer per rupee. Elsewhere prices were stationary or varied slightly.

**Bombay.**—The rainfall during the week was good in parts of Kanara, Kathiawar, Savantvadi and Kolhapur; moderate in parts of Ratnagiri; and slight in other districts. The rainfall was general and beneficial but more is needed for autumn crops in parts of Colaba, Kanara, the Deccan, the Karnatak, Savantvadi and Kolhapur. Sowing of autumn crops is completed in East Khandesh, Satara and Bijapur; it is nearly over in the Panch Mahals and Nasik and continues in Sind, Ahmedabad, Kaira, Surat, Kanara, West Khandesh and the Gujarat Native States. Transplantation has been completed in Ratnagiri; it is nearly over in Larkana and Kaira and continues in parts of Karachi, Sukkur, Ahmedabad, Thana and Kanara. Weeding is in progress generally. Standing crops are suffering in parts of the Deccan and Kolhapur owing to insufficient moisture; they have been slightly damaged by rats and insects in parts of Karachi, Hyderabad, and West Khandesh and by insects in parts of the Upper Sind Frontier, Poona, Bijapur and Dharwar and are generally in good condition elsewhere. Sowing of cotton continues in parts of Ahmedabad, Broach, Surat, Baroda and Cutch. The fodder supply is adequate. Agricultural stock are sufficient except in parts of Ahmednagar, Poona, Sholapur, Satara and Cutch and are generally in good condition. The supply of drinking water and of water for irrigation are generally adequate. Water is insufficient in canals in Sind. Prices of food grains have risen slightly in Ahmedabad, Kanara and Sholapur and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 32 to 41 per cent; in Gujarat 17 to 40 per cent; in the Konkan 9 to 35 per cent; in the Deccan 13 to 28 per cent; and in the Karnatak 35 to 38 per cent less than the normal. Stocks of grain are adequate. Labourers get sufficient employment. The cultivating and labouring classes are generally in fair condition. 93 persons were gratuitously relieved in Bijapur.

**Hyderabad.**—The rainfall during the week was 43 cents. The rain during the week was very scanty. Only four talukas received above 2 inches while 37 talukas received no rain. The Telingana districts were more fortunate than Maharawada. There was rain throughout the Raichur district, except in the Lingsugur taluka, which has improved prospects somewhat. Kuppal in the Salar Jang Estate received 1 inch 15 cents but this being insufficient prospects continue as before. The highest fall was 2 inches 64 cents in the Bodhan taluka of the Nizamabad district. Sowings of autumn crops are in progress in isolated tracts. Standing crops are fair to good generally except in the Raichur district and some other parts. Some damage was done to crops by insects in parts of the Nalgonda, Bir and Mahbubnagar districts. Lands are still under preparation for spring crops in most parts. Early rice sowings still continue in parts and where sowings have been completed weeding is in progress and seedlings are fair. Water scarcity is felt at the headquarters of the Yellareddi taluka. Cattle disease and fodder scarcity are reported in five and two talukas respectively. Prices:—wheat 7; coarse rice 7½; and *juar* 14½ seers per rupee. White *juar* is selling in Hyderabad City at 12½ seers per rupee. Yellow *juar* is not available. The highest price is 9 seers in the Kushtagi taluka of the Raichur district, the Paloucha taluka of the Warangal district and in the Adilabad district and the lowest 2½ seers in the Udgir taluka of the Bidar district.

**Mysore.**—The rainfall during the week was good in Bangalore and Mysore; and slight elsewhere. Prices of food grains are generally steady and markets are well supplied. Standing crops are in good condition. Prospects of the season are fair. Cattle are generally healthy. Water and fodder are available.

**Coorg.**—The rainfall during the week was 47 cents. Progress in transplanting rice is satisfactory. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient. Cattle disease prevails in parts.

**Madras.**—The rainfall during the week was heavy in South Arcot, Kistna and Trichinopoly; good in South Canara, Godavari, Guntur, Salem, Tanjore, North Arcot, the Nilgiris, Ganjam, Chingleput, Madura, Vizagapatam, the littoral and Cuddapah; and light to fair elsewhere. Irrigation supplies are insufficient in parts of districts except Vizagapatam, Godavari, Kistna, Chingleput, Trichinopoly, Tanjore, Malabar, South Canara and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are generally fair and have been benefited by the recent rains in North Arcot and Salem; but some in parts of the Deccan require more rain and some in parts of Coimbatore and Madura are withering. Harvests continue in parts with outturn poor to normal and bumper. Pasture is insufficient in parts of Guntur, the Deccan, Nellore, Coimbatore and Tinnevely. Fodder is scanty in parts of Godavari, Guntur, the Deccan and North Arcot. The condition of cattle is generally good. The price of rice is stationary in seventeen districts; has fallen in two; and has risen in four. The prices of millets have fluctuated as follows:—*Ragi* is stationary in twelve districts; has fallen in six; and has risen in three. *Cholam* is stationary in three districts; has fallen in five; and has risen in six. *Cumbu* is stationary in six districts; has fallen in eight; and has risen in one. The public health is generally good. Prospects are generally fair. The condition of the labouring classes is good and employment is available. Grain stocks are generally sufficient.

FAMINE.

*Statement showing the number of persons on relief works and in receipt of gratuitous relief in the Districts and Native States affected by famine or scarcity in India—(District details).*

**NOTE.**—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the corrected details of the totals reported in the telegraphic famine reports published weekly in the Supplement to the Gazette of India.

Non-labouring children and other dependants of relief workers are classed under relief works when distinguished in the local returns from persons gratuitously relieved in poor-houses or at their houses. Weavers relieved in their own trade are shown under "village doles or other relief."
